

Aleksandra Kulabukhova

Tbilisi, Georgia • Email: kulabukhova.alex@gmail.com

Full Stack Developer with a background in design, combining software development expertise with a strong understanding of UI/UX principles. Skilled at independently mastering new technologies and applying them in real-world projects. Focused on usability, data security, and code quality, following best practices as well as SOLID and DRY principles to build clean, maintainable, and scalable solutions.

EXPERIENCE

February 2026 – Present

Full Stack Developer

FixMyUX

- Refactored and further developed an application originally built using AI-assisted tools
- Prepared a mobile application for App Store release
- Implemented product analytics and user behavior tracking using PostHog
- Conducted security audit of the application and mitigated potential user data leakage risks
- Integrated payment systems, including Stripe and Apple In-App Purchases
- Implemented OAuth 2.0 authentication with Google and Apple providers

September 2025 – January 2026

Full Stack Developer

Habit Tracker

- Developed a REST API for managing users, habits, and activity tracking statistics
- Implemented session-based authentication with email verification via OTP and attempt limiting for security
- Ensured secure data storage using password hashing and one-time code encryption with bcrypt
- Designed backend architecture with clear separation into controllers, services, and repositories
- Built a responsive web interface with PWA support for mobile usage
- Implemented form validation using React Hook Form and Zod
- Created custom HTML email templates for sending verification codes

April 2025 – August 2025

Frontend Developer

VseDoctora

- Maintenance and development of a CRM system for doctors, managers, and

administrators
