

Aleksandra Kulabukhova

Tbilisi, Georgia • Email: a.kulabukhova001@gmail.com

Versatile Full Stack Developer with a strong foundation in both engineering and design. I combine technical problem-solving with a user-centered mindset to build intuitive and reliable applications. Quick to learn new technologies and apply them in practice. I focus on scalable architecture, usability, and data security. Self-driven and accountable for my continuous professional growth.

EXPERIENCE

2025 – *Habit Tracker* Full Stack Application

Demo: <https://habits-tracker-dusky.vercel.app/>

GitHub (frontend): <https://github.com/small-lizard/habits-tracker>

GitHub (backend): <https://github.com/small-lizard/habits-tracker-server>

Overview:

Habit tracking web application with user authentication, progress tracking, and analytics.

Key contributions:

- Designed and developed a full-stack application using React, Node.js and MongoDB
- Architected REST API with secure session-based authentication and email verification via OTP
- Implemented data security practices including password and token hashing (bcrypt) and request validation
- Built scalable backend structure (controllers, repositories, data models)
- Developed responsive UI with form validation (React Hook Form, Zod) and global state management (Redux Toolkit)
- Added internationalization (i18n) and PWA support for mobile-friendly usage

Tech stack:

Frontend: React, TypeScript, Redux Toolkit, React Hook Form, Zod, i18n

Backend: Node.js, Express, REST API, Session authentication

Database: MongoDB, Mongoose

Infrastructure: MongoDB Atlas, Vercel, Render

SKILLS

- **Hard skills:** JavaScript / TypeScript, HTML5, CSS3, React, Vite, Node.js, Express, MongoDB, Redux Toolkit, Figma
- **Soft skills:** Communicative, Collaborative, Adaptive, Flexible Organised
- **Languages:** Russian (Native), English (B2), French (A2)

EDUCATION

2019 — 2022 *Bachelor's degree in Psychology*
Kuban State University
