

Aleksandra Kulabukhova

Tbilisi, Georgia • Email: a.kulabukhova001@gmail.com

Full Stack Developer combining software engineering skills with a strong understanding of user experience thanks to a background in design. Quick to independently learn new technologies and apply them in practice. Focused on usability, data security, and code quality, following best practices, SOLID principles, and the DRY approach to write clean, maintainable, and scalable code.

EXPERIENCE

Habit Tracker - <https://habits-tracker-dusky.vercel.app/>

GitHub (frontend): <https://github.com/small-lizard/habits-tracker>

GitHub (backend): <https://github.com/small-lizard/habits-tracker-server>

Motivation

The project was created as a simple and fast-to-use habit tracker. The main idea was to avoid unnecessary settings and an overloaded interface, allowing users to create a new habit in just a few seconds.

Features:

- REST API with secure session-based authentication and email verification via OTP
- Secure user data storage: password and one-time code hashing using bcrypt
- Scalable backend architecture (controllers, repositories, data models)
- Responsive interface with form validation (React Hook Form, Zod) and global state management (Redux Toolkit)
- Developed responsive UI with form validation (React Hook Form, Zod) and global state management (Redux Toolkit)
- Localization support (i18n) and PWA support for a seamless mobile experience

Tech stack:

Frontend: React, TypeScript, Redux Toolkit, React Hook Form, Zod, i18n

Backend: Node.js, Express, REST API, Session authentication

Database: MongoDB, Mongoose

Infrastructure: MongoDB Atlas, Vercel, Render

SKILLS

- **Hard skills:** JavaScript / TypeScript, HTML5, CSS3, React, Vite, Node.js, Express, MongoDB, Redux Toolkit, Figma
- **Soft skills:** Communicative, Collaborative, Adaptive, Flexible, Organised
- **Languages:** Russian (Native), English (B2), French (A2)

EDUCATION

2019 — 2022 *Bachelor's degree in Psychology*
Kuban State University
